Hello.

To be clear, EPA expects that DEQ will require ARCADIS and/or Lockheed conduct the type of sampling discussed in my email of 6-18-12. If DEQ chooses not to do so, EPA is prepared to issue an Order requiring this work be conducted.

Subject: Update on Air Sampling at Lockheed Martin

Hi Christy,

I talked with ARCADIS this morning and here's what is being planned.

They are proceeding with the screening using the portable monitors and duplicate the constituents they originally monitored for, including hydrogen cyanide gas. They hope to have a written sampling plan at the end of this week for their internal review and submit to us soon thereafter.

They are scheduling the sampling to happen on July 6 and I plan on being present.

At this time, ARCADIS does not see the utility in testing for the suite of constituents proposed in your email. For whatever it means, neither ARCADIS or me have heard any feedback from Lockheed Martin. But seeing as ARCADIS is a co-permittee, they certainly can take the initiative and see what the current data is.

Let me know how EPA wants to coordinate, if at all, with this current sampling.

Cheers, Fredrick

Fredrick Moore
